

# Splitting a Deluxe Tub

## TWO FLAVOURS, ONE BASE

ADVANCED CREAMIFY TECHNOLOGY

TOP

FULL

BOTTOM

You can use the same base to make **two separate mix-in flavours**, such as cookies and cream for the **top portion** and chocolate chip for the **bottom portion**. Follow the instructions below to add two different mix-ins to the same base.

**Select TOP**, then use the dial to **select ICE CREAM**.

With a spoon, create a 4cm wide hole that reaches halfway down the Deluxe Tub. Add chocolate sandwich cookies to the hole and **select TOP and MIX-IN**.

When processing is complete, scoop out the cookies and cream and serve immediately.

To process the bottom half of the Deluxe Tub, **select BOTTOM**, then **select ICE CREAM**.

With a spoon, create a 4cm wide hole that reaches the bottom of the Deluxe Tub. Add chocolate chips to the hole in the Deluxe Tub and **select BOTTOM and MIX-IN**.

When processing is complete, scoop out the chocolate chip ice cream and serve immediately. Enjoy!

# Cheers! Let's make a drink.

## Making Drinkables in 1, 2, 3 Steps!

### Step 1: Freeze

For drinkable programs, fill the base to the DRINKABLE FREEZE FILL line on the Deluxe Tub and freeze for 24 hours.

### Step 2: Pour-In

After 24 hours, remove your base from the freezer and **add your desired pour-in until it reaches the DRINKABLE POUR-IN line.** A liquid pour-in must be added to the Deluxe Tub before processing to ensure the perfect sippable texture.

### Step 3: Process

After adding your pour-in, it's now time to process. Select the drinkable program that matches your base and enjoy! If your base is very cold, it may need to be processed a few times to reach the perfect texture.
